Printer Print-out

- Portable
- Prints data in list form
- Uses standard 2 ¼" paper

The TM24 Portable Printer is a battery-operated, portable printer available for the TRAILMASTER trail monitoring system. The printer allows you to quickly retrieve accumulated data and take a hard-copy print-out with you. This accessory is not necessary for data retrieval, but it can be a time-saving device for those operators who

frequently have to retrieve data from many units in the field, and do not have access to a computer. The TM24 Portable Printer requires a 12 volt power source, which does not come with the printer. 12 volt battery packs are available from Radio Shack or other local electronic supply house. Uses standard 2 ¼" roll of paper.
