**RAILMASTER**<sup>®</sup>

# Printing and Data Management Accessory

## **TM Data Collector II Data Retrieval and Storage System**

Includes: TM Data Collector II w / RS232 connector TM Collector Cable

Features:

59.000 Event Memory Non-volatile Memory NEW! Menu-driven capability when used with TMStatPack ver.69 or above Operation Temperature : -40° to +130°

> TM DATA COLLECTOR 7.5"L x 3.5"W x 2.1"D Weight: 1 lb. Power: 4 c-cell batteries (ALKALINE)

**OPTIONAL ACCESSORY for TM Data Collector II** TM Stat Pack Software/Cable

#### Use with TM StatPack Software for most efficient data analysis

#### Accessory for: TM1550 (1500), TM550 (500), TM700v. TM700vRT

The TRAILMASTER TM DATA COLLECTOR II is a data retrieval device used to retrieve and store data which has been recorded by TRAILMASTER Infrared Trail Monitors. The TM DATA COLLECTOR II is carried to each monitor, connected with a cable, and the data is quickly transferred. This allows the TRAILMASTER trail monitors to remain in the field collecting new data while the collected data is carried back to be printed out and analyzed.

The NEW! TM DATA COLLECTOR II is designed to hold 59,000 events by date and time. This information is stored in nonvolatile memory and is not lost when batteries are changed. Each standard TRAILMASTER trail monitor can store 1000 events. (Expanded memory monitors can store more events.) The NEW! TM DATA COLLECTOR II can store event data from many TRAILMASTER trail monitors -- more than 59,000 total events. The data is collected and stored by unit numbers, making it easy to keep track of data from various locations. When used with the NEW! TM STATPACK software, data can be viewed using a new advanced catalog funtion. Menu-driven operation\* is available when used with TM STATPACK software ver. 2004,1214,69 and above.

For the most efficient data handling, the TM DATA COLLECTOR It is designed to be used with an IBM compatible computer using the TM STATPACK software for data analysis; however, the data can be read out manually from the TM DATA COLLECTOR Ш.

Larger memory configurations are available.
