INTERVALOMETER
7.5"L x 3.5"W x 2.1"D
Weight: 1 lb.
Power: 4 c-cell batteries(ALKALINE)

Photos taken by Grant Woods with TRAILMASTER

- Accurate internal clock
- Fully controls camera activations
- Operates 12 months on C-cell batteries
- Compact and easy to set up
- Weather-proof (temp. range: -40°F to +130°F)

The TRAILMASTER Intervalometer has an accurate internal clock/timer which is used to control camera activations. Photographs can be taken automatically at specified time intervals during pre-selected times of the day. It is not an infrared monitor; it is a time-lapse control for camera operation.

The TM Intervalometer is the perfect tool to photographically monitor an area for changes that occur. You may photograph 24 hours a day, at selectable time intervals, from six seconds to 98 minutes. Or you may choose to photograph during one or two selected time zones during a 24-hour period with the same selectable time intervals as when photographing 24 hours a day.

The TM Intervalometer also has an adjustable 'maximum number of photos' limit. It is variable in increments of 10, from 20 to 250. There is also a 'no limit' feature. The film length you choose to use will help you decide what 'photo limit' to set. Some cameras have a film back accessory which will allow you to use larger rolls of film.

Additionally, the TM Intervalometer will let you control the length of time the electronic shutter release will be activated. This time is adjustable from 0.5 to 10 seconds and controls the number of photographs taken at each interval when your camera is in a "continuous mode". If your camera only has a single frame mode, this setting will have no effect.

The TRAILMASTER Intervalometer is equipped with a camera connector which lets you use it with the TM35-1 Camera Kit. As with other TRAILMASTER products, special cables can be adapted to work with some other cameras. Special cable availability and pricing will be provided upon request.

OPTIONAL ACCESSORIES

TM Intervalometer - TM 35-1 Camera Kit
TM Multi-Camera Trigger II
